

Enhancing Executive Leadership Coaching Using Virtual Reality

Definitions

- Virtual Reality - a cutting-edge technology that allows users to step into a world through the computer screen into a 3D interactive environment (Chen et al. 2004)

Definitions

- SecondLife - Second Life is a 3-D world that was created by its "residents". It was released in the public in 2003 and experienced explosive growth with millions of Residents inhabiting it from all over the globe.

The "marketplace" supports millions of US dollars in monthly transactions. (Linden Research, Inc. 2008).

Harvard Business Review

Tens of millions of people are honing their leadership skills in multiplayer online games. The tools and techniques they're using will change how leaders function tomorrow—and could make them more effective today.

Leadership's Online Labs

by Byron Reeves, Thomas W. Malone, and Tony O'Driscoll

Dr. Fernando Flores

"The main issue of being human is language. Since coaching comes from language it is important to understand what I mean by an ontological approach to coaching. This means that it isn't that we produce sounds that are understood. Our language reveals our way of being. It is our ability to co-ordinate commitments we make with others and our interpretation of communication".
